

Origami Owl (1)

This gorgeous little owl is easy to fold and sure to please! A perfect project for beginners...

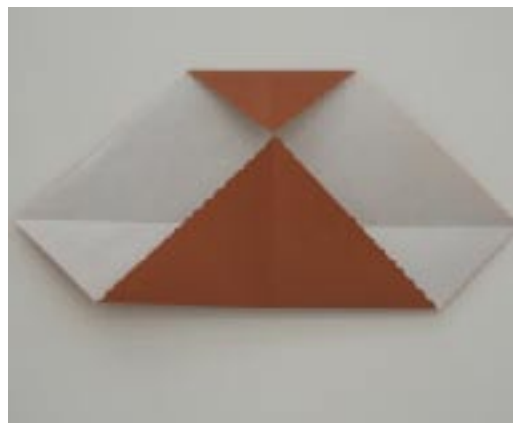

We've used our owl to deliver a message. You could also write a secret message under his wings!

1. Put your paper coloured-side down on the table, then fold in half along each diagonal, creasing and then opening out again.

2. Start to form your owl's head by folding the top corner down, as shown.

3. Bring the bottom corner up to meet it.

4. Fold the right corner into the middle to form one wing..

5. ...and bring the left corner in to the middle to form the other wing.

6. Make one final little fold to form the beak, and your owl is ready to decorate!
