

Origami Van

This van is so easy to fold and such fun to decorate, you could make a whole fleet! Choose bright colours and draw on your details with felt tip pens, or use stickers and colourful paper scraps to add a design.

1. Start with your paper coloured-side down, then fold in half first horizontally and then vertically. Open out again.

2. Fold the lower edge up to the centre and crease well.

3. Fold the outside top corners of the flap down as shown ...

4. ... to give you this.

5. Fold the top edge down along the existing centre crease line.

Origami Van - Page 2

8. Now fold it back up again so that the "wheels" are exposed at the bottom, as shown above.

9. Form the front of the van by folding the top corner down along the dotted line ...

10. ...to give you this.

11. Turn over and decorate - add a driver, a family, or a business!
